Hello,

I feel strongly that Microsoft has run their business in an unfair & uncompetitave manner, at the expense of the general public. THeY have run rough shod over the hopes, dreams, and rights of the people and companies who are or were their comptitors.

To allow them the fantastic opportunity to dominate the educational market with a degree thaty they must give a bunch of computer software & hardware - all valued at retail prices, is absurd. It will benefit M\$ rather than punish them for their unfair business practices.

Best,

Dave Nathanson
